MacWrite™/MacPaint™ Update   January 25, 1984

1. **Back up disks.**
   The Guided Tour disk *cannot* be copied. It is copy protected.

2. **Macintosh on/off.**
   Turn off the Macintosh before you insert the Guided Tour Disk.

3. **New Fonts and the MacWrite manual.**
   Several of the typefaces on Macintosh have been redesigned to be
   more readable. This changed the way most text appears on the
   screen. So if you follow the instructions in Chapter 1 of the MacWrite
   manual, what you see on your screen may not match the examples in
   the manual.

5. **MacWrite: Saving to a Different Disk.**
   When you're saving a document to a different disk that isn't
   initialized, a message asks you to initialize the disk. *Click Initialize
   and then press the space bar to start the process.*

6. **New "Partial Word" feature.**
   In the Find and Change commands in MacWrite's Search menu, a new
   option lets you choose to search for either entire words or parts of
   words (to find all words containing "ing", for example). Just click the
   appropriate button in the Find or Change window to change the search
   method.

7. **Guided Tour of MacWrite/MacPaint.**
   If you have used the Control Panel and if you change the rate of
   insertion point blinking to [1] or [3], please change it back to [2] before
   you use the Guided Tour of MacPaint and MacWrite.
